## PROFILE

Trained Full Stack Developer for modern applications. Currently Entry level with roughly 1 year of experience front-end and back-end environments. I spend on average 5-6 hours a day, seven days a week implementing new frameworks and applying new skills learned from mentors. Throughout my software development career. So far, I have leaned heavily towards algorithm driven applications for performance / efficiency and I have a taste for a good user experience. I'm excited to further strengthen my software development skills.

## EXPERIENCE

### Full Stack Developer Graduate 2022

- Experienced Web Developer adept in all stages of advanced web development- . Knowledgeable in user interface, testing, and debugging processes. Bringing forth expertise in design, installation, testing and maintenance of web systems.
- Positive and professional reputation for quality work. Completing projects before or on-time. Excellent ability to communicate with clients and make their visions come to life. Utilize free time researching new innovative ideas in the field of computer science, and front end/ back end design. Follow cohesive instructions to ensure all tasks meet requirements.
- Skilled and passionate Problem Solver with 15+ years of experience through Self Taught & Education. This includes: composing music for movies and video games, level design for video games, and more.
